

INFORMATION - SPIM

6th SPIM

Skin Physiology International Meeting
Palais des Congrès – Vichy – France
November 15th-16th, 2018

Be a delegate at SPIM Awards!

The unique forum for internationally renowned scientists and young researchers

A top-level interactive scientific forum

A forum for meetings, discussion and sharing information about the latest scientific research on the skin, SPIM is an exclusive event bringing together renowned international experts in physiology, biology, biochemistry and dermatology.

High quality conferences to analyse the latest information in the field of cutaneous physiology, opening up new lines of research and providing you with the opportunity to present your experiments and work; but also a special opportunity to hold discussions with other professionals from the various disciplines involved in the study of the skin, metabolic interactions and investigative methods.

The objective? To cross-reference understanding, enhance expertise and expand the field of possibilities.

Personal enrichment for all

The young researchers taking part in the Congress compete for an Award of €15,000 rewarding the best work, decided by a jury from the Scientific Committee.

A 2nd Award, opened to everybody, will be given to the Best Poster (scientific merit, originality of approach and presentation), nominated by all participants, with a prize of €4,000.

It's an opportunity for you to pass on your expertise to younger generations and for them to present their research, offering you the chance to appreciate new approaches and to discover new talent.

A friendly and accessible event in the spirit of open dialogue

Scientists of international renown and young researchers, a range of scientific disciplines, a welcoming and enthusiastic environment, highly accessible participation in terms of cost... SPIM is organised in a spirit of open dialogue, with the desire to contribute and to advance the skin sciences.

Scientific programme

Apoptosis versus Senescence

Intercellular Communication

Microbiota

Skin & Neuro-Sensitivity

Scientific Committee

Dr Philippe Blanchemaison, Vascular Physician, Paris

Dr Lionel Breton, Global Director Open Research, L'Oreal Research & Innovation, Aulnay, Paris

Prof. Frederic Caux, Dermatologist, Avicenne Hospital, INSERM UMR 1125, University Paris 13

Prof. Marek Haftek, CNRS Research Director, LBTI, UMR 5305 CNRS-UCBL1, University Lyon 1

Prof. Philippe Humbert, Director of CERT of the Laboratory of Cutaneous Biology University of Franche-Comte and University Mohammed VI, Casablanca

Dr Christine Lafforgue, Dermopharmacologist, Cosmetologist, University Paris Sud 11

Prof. Jérôme LAMARTINE, Full Professor of Genetics, Laboratory of Tissue Biology & Therapeutic Engineering, CNRS UMR 5305, University Lyon 1
